HiDe-Prompt size comparison: first task, TII1 + prompt1
Mean ± sample SD of three same-seed executions
Process wall time (s)
GPU-board energy (Wh)
CUDA allocator peak (GiB)
Process-tree RSS peak (GiB)
Short-pilot accuracy (%)
Partial supported operators (TFLOPs)
Base
Historical
Small
Tiny
Base is historical. Task1 alignment N/A. GPU-board energy excludes CPU/RAM. FLOPs use a separate partial-operator pass.
